Product Information

OPN-Power Spray Glue

- **high bond strength**
- **versatile usable**

Properties:

- high quality contact and assembly glue, based on synthetic rubber
- high bond strength
- economically and accurately doseable

Application Range:

- bonds permanently with each other and one another: paper, cardboard, polystyrene, felt, metal, many plastics, foam, wood, most textile fabrics, insulating mats, etc.
- usable in crafts, industry, etc.

Application:

Our information are recommendations based on our experience. We accept no liability for any damage without tests concerning suitability for the specific application, without preliminary trials and if the product is misused. Surfaces to be bonded have to be clean, grease- and dust-free, dry and free from old adhesive residues. Possibly roughen surface. **Turn spray nozzle into desired position.** For absorbent surfaces (e.g. wood, felt) the application amount should be increased. Spraying distance about 20-25 cm.

Contact bonding: Provide the parts to be bonded with glue separately. Let the glue dry for 5-15 minutes (depending on room temperature and application amount). Put parts together precisely and press them together. Subsequent corrections are nearly impossible.

Assembly bonding: Provide the parts to be bonded with glue separately. After a short evaporation time put parts together with glue still in wet condition. Corrections are possible even after longer time (depending on the material properties). Don't load the bonding until the glue has fully bonded (about 24 hours). **To prevent a possible nozzle clogging, turn the can after use upside down and spray until no glue emerges from the nozzle!**

Only for professional use! Always observe safety data sheet before use.

WARRANTY: 12 months

delivery information: Art.-No. 48580

Spray: 500 ml Content, Packing Unit: 12 Cans/Carton

Observe the information on the label and of the EC-safety data sheet!

Our technical information has been compiled carefully to the best of our knowledge.
