Product Information

OPN-Belt and V-Belt Spray

- ***Improves contact with pulleys***
- ***Protects against weather influences***

Properties:

- Improves contact with the pulleys
- Increases the service life of belts and V-belts
- Keeps the drive belts supple
- Protects against weather influences
- When used properly, a performance increase of up to 300% is possible
- Temperature-resistant up to approx. + 70 ° C

Application Range:

- Belts and V-belts made of leather, fabric, many rubber types, etc.
- For almost all industrial pulleys, flat belts, round belts, V-belts etc.
- On agricultural machines, industrial machines, autoventilation belts etc.

Application:

Our information are recommendations based on our experience. We accept no liability for any damage without tests concerning suitability for the specific application, without preliminary trials and if the products is misused. Spray the side surfaces of the V-belt on both sides. Let it dry for a short time. Then the belt is ready for operation. **The processing temperature is approx. 18°C.** If the content is thickened because of low temperatures, place the product in a warm room for a few hours, then check if the active ingredient is ready for use.

Protect from frost, store at room temperature!

Only for professional use! Always observe safety data sheet before use.

Delivery information: Art.-No. 61270

Spray: 400 ml Content, Packing Unit: 12 Cans/Carton

Observe the information on the label and of the EC-safety data sheet!

Our technical information has been compiled carefully to the best of our knowledge. Because of the many possible influences during processing and use of the products they do not relieve the processor of its own, conscientious exams! A legally binding assurance of certain properties or of the suitability for a particular purpose can not be derived from our information. Existing laws and regulations must be checked and observed from the processor of our products before use in his own responsibility.
