Product Information

OPN-UF 2001® Weld Separating Agent *CLEAR*

- **NON-FLAMMABLE**
- **silicone-free**
- **wax-free**

Properties:

- prevents the burning of welding spatters on workpieces and welding tools
- paint-friendly, when used properly

Application areas:

- weld separating agent for inert gas and electrode hand welding

Application:

Our information are recommendations based on our experience. We accept no liability for any damage without tests concerning suitability for the specific application, without preliminary trials and if the product is misused. Clean workpieces from any residues. **Use undiluted.**

Spray very thinly and evenly. This is necessary in order to exclude the formation of pores in the weld metal or that hydrogen-induced cracks arise at sensitive steels and critical stresses.

Base: Aqueous emulsion. Do not let emulsion get into the welding seam!

Apply with atomizer e.g. OPN Manual Hand Atomizer. In case of after-treatment of the workpieces (painting, hot-dip galvanizing, etc.), a test and possible cleaning is recommended in advance.

Shake well before use! Do not inhale spray, process only in well-ventilated areas!

Only for professional use! Always observe safety data sheet before use.

Close the canister immediately after removing the liquid.

Protect against contamination and frost.

Delivery information:

Art.-No. 65157 Disposable Canister: 10 liters content

Art.-No. 65153 Disposable Canister: 20 liters content

Observe the information on the label and of the EC-safety data sheet!

Our technical information has been compiled carefully to the best of our knowledge. Because of the many possible influences during processing and use of the products they do not relieve the processor of its own, conscientious exams! A legally binding assurance of certain properties or of the suitability for a particular purpose can not be derived from our information. Existing laws and regulations must be checked and observed from the processor of our products before use in his own responsibility.
