Product Information

OPN Spray Handle "Pistol Grip Pro" for Aerosol Cans

- turns every spray can into a spray unit for professionals
- universally applicable - fits on all standard spray cans with standard spray nozzle
- simply attach to the valve of the can and press the spray head by pulling the "trigger"
- a comfortable "trigger" allows easy, pleasant, fatigue-free spraying of aerosol cans, especially when treating large areas
- ensures an accurate and controlled dosing of the active ingredient
- prevents contaminations by active substance on the hands
- even in areas where protective gloves are worn, the OPN Spray Handle enables trouble-free working with the spray can
- to use again and again - please note the following advice on proper handling: Look at the symbols on the grip of the OPN Spray Handle and note that these must always be placed and removed horizontally as shown!
- *Note from practice:* Even when using the OPN Spray Handle remember that many sprays before and also during longer spraying, e.g. when spraying larger areas, must be shaken for a sufficiently long time to ensure proper emptying! This is particularly important for sprays which contain solids, e.g. Zinc and Aluminum Spray, Lubricating Metal Assembly Spray, Underbody Coating Spray, etc.

Our technical information has been compiled carefully to the best of our knowledge. Because of the many possible influences during processing and use of the products they do not relieve the processor of its own, conscientious exams! A legally binding assurance of certain properties or of the suitability for a particular purpose can not be derived from our information. Existing laws and regulations must be checked and observed from the processor of our products before use in his own responsibility.
